Science is a system of acquiring knowledge, using observation and experimentation to describe natural phenomena. By this definition, Evolution is as much a matter of Faith as Creation is. The origin and beginning of what is cannot be observed and reproduced by experiments. The book unveils the academic and educational fraud in the Western world that retain that what is came into existence by random change and natural selection against the findings of the Sciences, especially over the last hundred years. The phenomena of irreducible complexity and the information concept reduce Evolution to science-fiction.
