RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 34 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1917 Excerpt: . . . Xo. 5 on carbon and carbon troubles. Valves Must Operate Correctly To secure a perfect carbureter adjustment, the valves must seat perfectly and open and close correctly. Before proceeding with the carbureter adjustment it is absolutely necessary to be sure that when the cam is disengaged on each particular valve rod guide, all the slack is taken up on the valve tappet, valve rod and rocker arm. so that the rocker arm has a clearance of one thirtysecond of an inch over the valve stem. This distance must not be varied. 156 Fig. 18 shows a diagram of the cam, valve rod and rocker arm giving a clear-ance of one thirty-second of an inch over the valve stem when the cam is pointing downwards. Carbureter adjustment can be interfered with very readily and the engine can lose power if the clearance is greater or less than one thirty-second of an inch. 155--The magneto must fire the compressed charge at the proper point. See para-graph 180. page 51, for the proper timing of the magneto. When to Commence Carbur-eter Adjustment In general, it may properly be said that the adjustment of the carbureter commences by being sure the butterfly shaft and bearing, intake mani-fold, intake manifold gaskets, valves, valve stem guides, piston and piston rings exclude the en-trance of air from the combustion chamber, thus causing all the air to enter through the carbureter. Mechanical details to be looked after are to make sure that the rocker...
