

## Controlled Release in Oral Drug Delivery

Filesize: 7.68 MB

### **Reviews**

*Absolutely one of the best ebook We have possibly go through. I was able to comprehended every thing using this published e book. Its been developed in an extremely straightforward way and it is merely soon after i finished reading through this ebook where basically transformed me, change the way i really believe.*

## CONTROLLED RELEASE IN ORAL DRUG DELIVERY

[DOWNLOAD](#)

Springer-Verlag Gmbh Sep 2011, 2011. Buch. Book Condition: Neu. 242x155x30 mm. Neuware - Controlling the rate, extent and time of a drug s delivery can optimize its performance in many ways, relative to immediate release delivery. Such optimized design requires a broad knowledge base of topics such as gastro intestinal tract physiology, polymer science, and the mechanisms by which drugs are released from the formulated units. Technologies to reduce to practice also need to be carefully considered. Such knowledge must be allied to the physico chemical properties of the drug, its pharmacokinetic behaviors, enzyme susceptibility and other factors that can affect absorption or timecourse in the biosystem. Traditionally, controlled release systems tended to be second-generation products, building on accumulated clinical experience. However, better awareness of the molecular biology of drug action and the promise of biomarkers and personalized medicine may mean that optimizing performance by controlling release may become a first option in new product development. Such optimization may well help reduce the alarming attrition rates that are now prevalent in new drug development. Controlled Release in Oral Drug Delivery provides chapters, dealing with all facets of the above subject matter, and its challenges. Authors have been drawn from academia, providers of excipients and from those designing controlled release systems in industrial R&D and manufacture. The contents provide a unique blend of cutting edge knowledge, data on materials and practical experiences. It is essential text for students, researchers and industrial engineering, formulation and manufacturing technologists as well as quality testing and control functions. Clive Wilson is the J. P. Todd Professor of Pharmaceutics at Strathclyde University in Glasgow, Scotland and the current president of the European Union Federation for Pharmaceutical Sciences. He is the Chief Scientist of Bio-Images Research Group, a Phase II imaging specialist clinical unit in Glasgow Royal...
